Vinger op de camera en Fibricheck meet uw hartritme. @Raymond Lemmens

Overheid promoot eerste 'betrouwbare' medische apps

Minister van Volksgezond-heid Maggie De Block (Open VLD) promoot vanaf zaterdag vier medische apps op mhealth-belgium.be.

BRUSSEL | De Block wil op termiin een overzicht bieden van alle apps die voldoen aan de medische en wettelijke vereisten. Je zult er informatie vinden over de werking en de voordelen van online toepassingen voor de patiënt of de zorgverlener', stelt haar kabinet. De minister werkt daarvoor samen met gezondheidsadmini-

Fibricheck

Fibricheck kan hartritmestoornissen opsporen en voorkamerfi brillatie detecteren. U plaatst uw vinger op de camera van uw smartphone om uw hartritme te registeren. De gegevens worden automatisch gedeeld met een arts die meteen een diagnose kan stellen. Zo krijgt u sneller een aangepaste behandeling.

straties Agoria en beMedTech.

Een app die patiënten voor er na een heup- of knieoperatie helpt optimaal te revalideren. U kriigt aangepaste oefeningen, advies, in formatie en coaching. Via een in gebouwde microfoon kunt u vra gen stellen aan een therapeut.

RemeCare

Via de RemeCare Oncologie app kunnen zorgverleners en kan kerpatiënten in hun thuisomge ving vlot met elkaar communice ren over hun chemobehandeling U kunt registreren hoe ernstig d nevenwerkingen van de chemobe handeling zijn. Daardoor kan he ziekenhuisteam sneller ingrijper en de medicatie optimaal doseren

Hebt u slaap- of ademhalings

problemen, dan kunt u deze app gebruiken voor een slaaptest bij u thuis. De app behandelingen er ondersteunt u met een screening een diagnose en therapie-opvol ging, cato

La Belgique doit rembourser au plus vite les applications médicales

applications médicales est énorme, Cette technologie

History of mHealthBelgium

- Based on action item 19 of the federal e-health roadmap 2.0 consisting out of 20 e-health action items defined in 2015
- In **September 2016**, 98 projects were submitted 24 were selected
- By mid 2018 a follow-up structure was created: the validation pyramid
- Launched by the government after summer 2018
- Platform went live for the first time on 25 January 2019

.AGORIA

AP19 = mHealth: why?

- Upcoming technology
- Need for new framework
 - Quality
 - Privacy
 - Evidence
- Goal = integrate mHealth applications in Belgian healthcare system

mHealthBelgium: the stakeholders

- mHealthBelgium is an initiative of the Belgian Federal Government.
- This platform is managed by beMedTech (sector federation for industry of medical technologies) and Agoria (sector federation of technological industry), in close cooperation with three national authorities

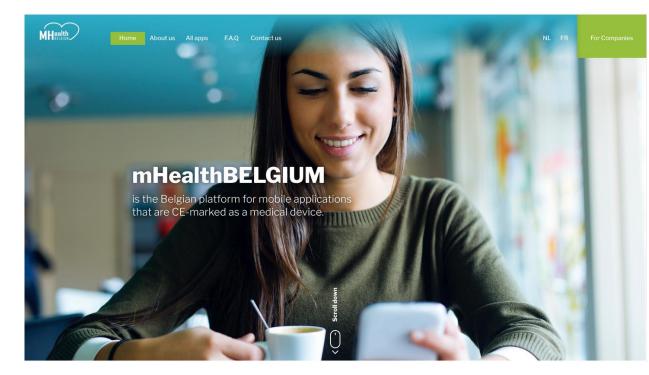

The platform: what? Who?

- www.mhealthbelgium.be
- In 3 languages: NL-FR-EN
 (DE out of scope at this stage)
- Information for
 - Broad public
 - Patients
 - Healthcare professionals
 - Healthcare institutions
- List of validated apps
 - No full market scan
 - Company driven

Objective of the platform mHealthBelgium

- Provide an overview to patients, healthcare providers and healthcare professionals of the various (CE-Marked as medical device) health-apps that wish to provide information around their status in the pyramid
 - It's the manufacturer who decides if the app is published or not
 - It's the manufacturer that informs mHealthBelgium of its status.
 - It's the manufacturer who is responsible of the quality of the information
 - mHealthBelgium does NOT "guarantee" or "validate" this information, but there are some built-in checks

Level 3

I show social-economic evidence and get reimbursed by RIZIV

Level 2

I am safely connected

Level 1

I am a CE certified medical device

3

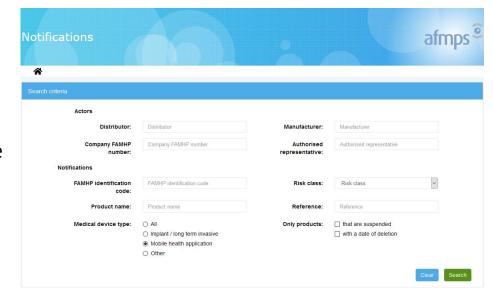

1

Level 1 (M1): the basic criteria for an app.

- CE declaration as a medical device is submitted
- Voluntary notification of the mobile app to the Federal Agency for Medicines and Health Products (FAMHP) during which the CE marking and the compliance with the rules and regulations for medical devices are confirmed and can be checked.
- The app and the parent company declare that they comply with the EU General Data Protection Regulation (GDPR).

PACSonWEB By Dobco Medical Systems

PACSonWEB is a platform based on pure HTML5 web technology that lends support to all scenarios for the secure delivery of medical images and reports to extramural recipients.

Revalidatieapps vanaf oktober tijdelijk kosteloos

©katrijn van giel

PIETER HAECK | 14 juli 2020 13:11

Patiënten met een knie- of heupprothese die vanaf oktober willen revalideren met een smartphoneapp moeten daar in bepaalde ziekenhuizen tijdelijk niets voor betalen.

Level 3 (M3): financing after approval NIHDI

- Meet the basic criteria of level 1 and level 2
- Have a demonstrated social-economic added value
- Expected by the end of the year
- Will provide information on the status of the financing request to the NIHDI and timeline
 - Submitted
 - Accepted for review
 - Approved
 - Rejected
- Note that mobile health apps can also be financed by other means
 - Own financing of hospitals
 - Health insurance companies

Level 3 (M3): High level procedure

- When M1 and M2 is obtained, a company can submit a reimbursement/financing request
 - Description of the app
 - Role and value of the mHealth technology in the care path
 - Budget impact transversal effects included
- WG telemedicine will review the dossier, including a hearing of the company and decides whether such technology is valuable to allow financing
- A specific WG will be created defining the financing proposal
- Final decision is done by the Insurance Committee
